Choosing a new entryway is a big decision.

The entry is the focal point of your home. A beautiful entry enhances your home’s architecture and adds curb appeal. It also welcomes friends and family, expresses your style, and can hint at what’s behind the door.

Glass entryways do even more. They let in natural light while providing the level of outdoor visibility and indoor privacy you want. And doorglass adds a myriad of design possibilities to let you personalize your entry.

1. Choose Your Clear Glass

Blinds between glass are ideal for patio and back doors or anywhere you want light and privacy control. They also control heat gain from the sun to keep your house more comfortable. Want to coordinate with your windows? Doorlites with external or internal grilles work in both front and back doors. For a more contemporary look, doorglass without grilles make striking front entries, and they allow an unobstructed view of the outdoor living space when used in the back of the house.

A.

B. Low-E or Low-E Plus

Consider Low-E glass to make your house more comfortable while saving energy.

Low-E & Low-E Plus

Low-E energy efficient glass is available in clear glass, external and internal grilles, and blinds.

(left) In winter, Low-E glass reduces heat loss to the outside and allows solar energy to pass inside.

(right) In summer, Low-E glass is a proven energy saver, reducing air conditioning costs by reducing solar heat gain.

2. Choose Your Decorative Glass

A. Handcrafted decorative doorglass will set your home apart from others and enhance its curb appeal. Choose the glass design on pages 10-83 that best complements your home’s style, finishes, and exterior fixtures. Some things to consider:

Caming: the metal that holds the textured glass in a decorative glass design.

Privacy

Textures: See all of our glass textures at www.western-reflections.com
2. Choose Your Design

B. 

Architect Collection

Designer Collection

Builder Collection

Western Reflections offers a wide range of doorglass shapes and sizes. See what's available in each design on its feature page or on the handy design/size matrix on pages 116-117.

3. Choose Your Frame

We offer a wide array of doorglass frame styles, colors, and materials to meet specific needs.

Beautiful displays bring doorkites to life. Our new digital display shows you what light looks like coming through the glass, allows you to display a large selection of glass in the space required for a single door; and it’s easy to update. Add a Western Reflections digital display to your showroom and start inspiring your customers.
Newly designed display headers are eye-catching, informative, and easy to add to your existing or new display stands. Each provides a beautiful image and information about the displayed glass and is a perfect complement to the Western Reflections catalog and website.
Beauty and elegance define our Architect Collection. The Collection includes our broadest array of cameing finishes, including antique brass, brass, oil-rubbed bronze, chrome, black chrome, satin nickel, patina, and platinum. The choice is yours.

Whether you’re looking for classic, Craftsman, transitional, or contemporary doorlites, you’ll find them in our Designer Collection for entry and patio doors. Pembrook features our wide, flat caming that’s at home in almost any entry. Vintage Craftsman, Sylvan Park, and Riverwood offer three styles for Craftsman fans. Where else will you find decorative glass designed just for patio doors? It’s all here.

Decorative Glass

Western Reflections’ severe weather / impact doorglass meets DP±66* wind and missile impact code requirements. STC (sound transmission class) testing shows that the laminated glass provides up to 30% protection from outside noise infiltration when used in a properly fitted and installed door system.

*Can be used in 150 mph zone in one and two story buildings.

See our Severe Weather / Impact Doorglass brochure for more doorglass and sidelite sizes.

Western Reflections
Thousands of marine turtles nest in the U.S. coastal areas, and state and local ordinances protect hatching turtles by limiting the brightness of inside-to-outside visible light transmittance. Our Severe Weather/Impact product line includes tinted gray glass that meets these code requirements.
Severe Weather / Impact
Store, organize, and create... anywhere in your home.

Where you have interior doors, you have new possibilities.

ON HAND is designed for customization, so you can decide the best storage and décor approach for any number of places throughout your home. A kitchen pantry, craft room, bedroom, closet, linen closet, laundry room, and basement door are all perfect for ON HAND.

ON HAND lets you take an interior door and transform it into much, much more.
In-Door Storage and Communication System
